# CONTENTS

React. Kinet. Catal. Lett., Vol. 50, Nos 1–2 (1993)

Preface

Oral Presentations

*A. A. Chuiko:* Problems of silica surface chemistry 1

*L. T. Zhuravlev:* Characterization of amorphous silica surface 15

*M. Craiu, R. Marchidan, E. Ivana, A. Butucelea* and *L. Nistor:* History dependent structural properties of alumina supported nickel oxide 27

*A. A. Tsyganenko:* Structure and properties of hydroxylated surfaces of oxides 33

*Kai-Ji Zhen, Quan Wei, Jiang Wang* and *Ying-Li Bi:* A study on the properties of perovskite-type compounds 39

*G. Munteanu* and *M. Craiu:* Influence of the experimental parameters on the TPR profiles 49

*L. E. Cascarini de Torre* and *E. J. Bottani:* Some characteristics of oxidized graphite samples 55

*R. Leboda, A. Gierak, B. Charmas* and *L. Łodyga:* On the activation and deactivation of patch-like carbon-mineral adsorbents 63

*M. Čapka, M. Czakoová, J. Hjortkjaer* and *U. Schubert:* Catalytic activity of homogeneous and silica-anchored rhodium complexes 71

*Vladimir I. Bogillo:* Kinetic models for the chemisorption of organic compounds on oxide surfaces 75

*Vladimir A. Basyuk:* Reactions of gaseous organic compounds on silica surface. Spectral studies and synthetic aspects 83

*Yu. I. Gorlov:* Stereochemistry of transition states and mechanism of chemical reactions on silica surfaces 89

*V. M. Gun'ko:* Dynamic simulation, kinetics and mechanism of surface reactions on oxides 97

*V. M. Ogenko:* Chemical physics of dispersed material surface 103

*I. P. Suzdalev, N. I. Shklovskaya* and *V. K. Imshennik:* Mössbauer spectroscopy in chemical physics of heterogeneous processes 115

*J. Heidberg, E. Kampshoff, M. Kandel, R. Kühnemuth, D. Meine, O. Schönekäs, M. Suhren* and *H. Weiss:* Polarization Fourier transform infrared spectroscopy on ionic single crystal surfaces: splittings, adsorbate structures and 2D-phase transitions on NaCl(100) and MgO(100) 123

Poster Presentations

*L. J. van Ijzendoorn, M. J. A. de Voigt* and *J. W. Niemantsverdriet:* Material analysis with Rutherford Backscattering Spectrometry; application to catalysts 131

*M. Vassileva, A. Andreev, G. Schulz- Ekloff* and *D. Wohrle:* Effect of hydrophobized active carbon on the catalytic activity and adsorptivity of supported cobalt(II)-phthalocyanine 139

*I. Mitov, S. Asenov, T. Tomov* and *A. Andreev:* In situ Mössbauer spectroscopic investigation of iron-oxide based water-gas shift catalysts 145

*G. B. Kuznetsova, V. Mayagoitia* and *F. Rojas:* Adsorption potential topology of disordered surfaces 151

*Wan Xi Zhang, Jun Xu Shi Quan Xi, V. A. Kaspersky, V. V. Brei, A. F. Fesenko and Y. M. Ogenko:* Effect of hydrophobic oxides on radiation crosslinking of low density polyethylene 159

*G. R Yurchenko, A. K. Matkovsky* and *A. P. Shimansky:* Adsorption and thermodinamic properties of active sites of a pyrogenic aluminium oxide surface 163

*V. M. Ogenko, A. V. Fesenko, N. D. Konovalova* and *V. I. Stepanenko:* Reactivity of sites on $Al_2O_3$ surface modified by Ni 169

*E. F. Voronin, V. I. Zarko* and *E. M. Pakhlov:* Structure and nature of active sites on the surface of pyrogenic titanosilica 175

*V. I. Zarko* and *O. V. Gulko:* Dielectric isotherms of water sorption on pyrogenic silica and titania surfaces 179

*L. G. Grechko, V. I. Zarko* and *V. V. Motrich:* Dielectric losses of disperse silica 183

*V. I. Zarko* and *A. A. Tumanov:* Influence of pyrogenic silica hydration on water diffusion in surface layers 189

*L. A. Bondar, L. M. Kustov, I. P. Beletsky* and *V. B. Kazansky:* Synthesis and some properties of titanium-containing silica gels 193
*O. I. Yakimova, A. M. Eremenko* and *A. A. Chuiko:* Exciplex photonics on aerosil surface 199
*V. P. Kondilenko, V. Ya. Chorny* and *A. M. Eremenko:* Thermal activation of complexation reaction on aerosil surface 203
*V. V. Osipov, A. Ya. Ritter* and *Yu. Ya. Samoylenko:* Bimolecular quenching in the adsorbed layer 209
*G. M. Telbiz, V. M. Gun'ko, G. Tamulajtis* and *A. V. Shwets:* Surface spectroscopy and structure of CdS/zeolite systems 215
*E. F. Sheka, I. Natkaniec, I. Markichev, A. Chuiko, V. Khavryutchenko* and *V. Ogenko:* Vibrations of dispersed silicas: a comparative study 221
*V. T. Adonkin, V. V. Dyakin, V. M. Ogenko* and *A. A. Chuiko:* Positron spectroscopy of rehydrated pyrogenic silica surface 227
*V. T. Adonkin, B. M. Gorelov, P. P. Gorbic, V. V. Dyakin, G. N. Cashin, L. I. Mirontsov, D. V. Morozovskay* and *G. M. Shalyapina:* Surface diffusion of nickel in metal oxide superconductors and external effects 235
*V. V. Turov:* NMR data on surface solvation of dispersed silica particles in frozen aqueous suspension 243
*A. N. Morozov, V. M. Rozenbaum, L. G. Grechko* and *V. M. Ogenko:* Monte-Carlo calculations of phase transition temperatures for a triangular dipole lattice 249
*A. G. Grebenyuk, V. A. Zayets* and *Yu. I. Gorlov:* An improved version of NDDO method and its use in the study of bulk and surface properties of titania 257
*A. G. Grebenyuk, V. A. Zayets* and *Yu. I. Gorlov:* Molecular models for surfaces of solids with hypervalent coordination environment 263
*U. M. Ogenko, A. V. Fesenko, E. V. Zakharova* and *M. F. Tsurul:* Synthesis, structure and composition of an expanding form of metallized graphite 269
*I. G. Chernysh, S. V. Pakhovchishin* and *V. P. Goncharik:* The activity of dispersed oxides on natural and exfoliated graphite surfaces 273
*V. V. Turov, K. V. Pogorely* and *T. N. Buruskhina:* Anomalous chemical shifts of water and organic molecules adsorbed on graphitized surfaces of various types 279
*N. I. Kovtyukhova:* Sorptive properties of graphite oxide on the surface of Al, Mg and Zn oxides 285
*M. E. Sharanda, L. N. Ganyuk* and *V. M. Ogenko:* Fixing of Si–H groups on the surface of dispersed silica and their physical and chemical properties 291
*Vladimir A. Basiuk* and *Taras Yu. Gromovoy:* Reactions of vaporous proteinogenic α-amino acids on silica and alumina surfaces 297
*E. M. Pakhlov, V. M. Gun'ko* and *E. F. Voronin:* Interaction of trimethylchlorosilane with silanol groups on silica surface in the presence of amines 305
*V. N. Doroshenko, V. A. Pokrovskii, I. R. Entinzon* and *A. A. Chuiko:* Participation of adsorbent active centers in radiation-chemical polymerization of α-oxides 311
*A. A. Chuiko, V. N. Doroshenko, V. N. Kaurkovskaya, E. P. Jakubenko* and *L. N. Komary:* Radiative-thermal modification of dispersed and fibrous adsorbents by metal compounds 319
*V. P. Zhereb, E. N. Voskresenskaya, L. I. Kurteeva, V. F. Kargin* and *A. G. Anshits:* Role of phase boundary in heterogeneous oxide catalysts for oxidative coupling of methane 327
*D. Yu. Lyshenko* and *L. A. Belyakova:* Oxygen-containing organosilicas: synthesis and properties 333
*T. P. Kolotusha* and *O. V. Lisunova:* Synthesis of two-dimensional polyorganosiloxane layers on silica surface 337
*I. N. Polonskaya* and *L. A. Belyakova:* Silicas with thiourea grafted groups for the concentration of heavy metal ions 343
*L. Zorya* and *V. Krot:* Method of high-purity silica production from hexafluorosilicic acid 349
*Viktor P. Shkilev* and *Vladimir I. Bogillo:* Application of linear models for description of adsorption phenomena on heterogeneous solid surfaces 355
*L. G. Ilchenko, L. G. Grechko* and *A. A. Savon:* Theory of electrostatic interaction of charges with atomically pure and hydroxylated surface of dielectrics 363
*G. S. Yablonskyii, A. V. Myshlyavtsev* and *F. Chuldum:* Models of phase transitions for adsorption of simple molecules on metal and oxide surfaces 371
*I. P. Beletskii, Yu. I. Gorlov, A. G. Grebenyuk* and *V. E. Klymenko:* Comparative investigation of the electronic structure and acidic properties of aluminophosphates and silicoalumino phosphates 377
*V. P. Vislovskii, E. A. Mamedov* and *R. G. Rizayev:* Build-up of active oxide surface under influence of the reaction mixture 383
*V. Khavryutchenko* and *E. Sheka:* Computer modeling of amorphous silica structures 389
*V. V. Brei, V. A. Kaspersky* and *N. U. Gulyanitskaya:* Synthesis and study of boron phosphate and titanium silicate compounds on silica surface 415
Book Review 423
